THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE
OF THE UNITED STATES WITHIN THE MEANING OF THE ESPIONAGE ACT OF
U.S.C. 11 AND 22. AS HEREIN, THE TRANSMISSION OR THE REVELATION
OF ITS CONTENTS IN ANY MANNER TO AN UNAUTHORIZED PERSON IS PRO-
HIBITED BY LAW. REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

50X1-HUM

1. An anti-tuberculosis immunization campaign was undertaken in Yugoslavia and injections were given in December 1949 and January 1950. An unspecified number of persons in Dalmatia and three persons in Split died after receiving the injections and a large number became very ill. In many cases the children who were tubercular at the time subsequently became seriously ill and a number died.
2. The illness manifested itself in a skin rash (resembling water blisters) and a fever. It is believed that either the drug was faulty or that the doctors had little knowledge on how to administer it.

This document is hereby regraded to
CONFIDENTIAL in accordance with the
letter of 16 October 1978 from the
Director of Central Intelligence to the
Archivist of the United States.
